

RACIOCÍNIO ALGORÍTMICO - TDE1

Pedro Henrique Batista Santana

Instalação do Git feita diretamente pelo executável do site: <https://git-scm.com/install/windows> .

The screenshot shows the Git website's 'Install' page. The header includes the Git logo and the tagline '--distributed-even-if-your-workflow-isnt'. A search bar is present on the right. The left sidebar contains links for 'About', 'Learn', 'Tools', 'Reference', 'Install' (highlighted), and 'Community'. The main content area is titled 'Install' and shows the 'Latest version: 2.54.0 (Release Notes)'. Below this, there are tabs for 'Windows', 'macOS', 'Linux', and 'Build from Source'. The 'Windows' tab is selected, showing instructions to download the latest (2.54.0) x64 version of Git for Windows. It mentions that this is the most recent maintained build, released 25 days ago, on 2026-04-20. Under 'Other Git for Windows downloads', there are links for 'Standalone Installer', 'Git for Windows/x64 Setup' (highlighted with a red arrow), 'Git for Windows/ARM64 Setup', 'Portable ("thumbdrive edition")', 'Git for Windows/x64 Portable', and 'Git for Windows/ARM64 Portable'. There is also a section for 'Using winget tool' with instructions to install it if not already present, and a command prompt example: `winget install --id Git.Git -e --source winget`. The current source code release is version 2.54.0, and users can build it from the source code. A 'Now What?' section follows, stating that now that Git has been downloaded, it's time to start using it.

The screenshot shows the Windows Start menu search results for 'Git CMD'. The 'Best match' section shows 'Git CMD App'. Below this, the 'Apps' section lists 'Git GUI' and 'Git Bash', each with a right arrow. On the right side, there is a large tile for 'Git CMD App' with the Git logo. At the bottom right, there is an 'Open' button with a document icon.

Prova de que a instalação foi feita através do comando “git --version” feito para verificar a versão do git presente na máquina:

```
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git --version
git version 2.52.0.windows.1
PS C:\Users\Pedro\Documents\Python TDE1\python_ex>
```

Configuração do usuário foi feita através dos comandos :

git config --global user.name “”

git config --global user.email “”

```
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git config --global user.name "Pedro Henrique"
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git config --global user.email "pedrocahenriquebatista98@gmail.com"
PS C:\Users\Pedro\Documents\Python TDE1\python_ex>
```

Foi criado um repositório no GitHub para armazenar os exercícios realizados:

https://github.com/PedroHBS7/python_ex/tree/main

The screenshot shows a GitHub repository named 'python_ex' (Public) by user 'PedroHBS7'. The repository has 1 branch (main) and 0 tags. The file list includes 'Imports', 'Listas_Vetores', 'Matrizes', 'Matrizes2', and 'README.md'. The README file is selected, showing the title 'TDE GitHub' and the description 'Projeto desenvolvido para a atividade TDE 1 da disciplina de Raciocínio Algorítmico.' The objective is 'Aprender os conceitos básicos de versionamento utilizando Git e GitHub, aplicando práticas como:'. The practices listed are: criação de repositórios; commits organizados; utilização de branches; and pull requests. The right sidebar shows 'About' (No description, website, or topics provided), 'Releases' (No releases published), 'Packages' (No packages published), 'Contributors' (1 contributor: PedroHBS7), and 'Languages' (Python 100.0%).

Commits realizados com descrição de cada mudança feita no commit:

Todo o processo de fazer pull request e merge:

Criar uma Branch nova para fazer o merge:

```
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git checkout -b minha-feature  
Switched to a new branch 'minha-feature'
```

“Git add .” utilizado para adicionar todos os arquivos modificados do projeto à área de preparação (staging area), permitindo que sejam incluídos no próximo commit”

```
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git add .  
warning: in the working copy of 'Funcoes/ex01.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex02.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex03.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex04.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex05.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex06.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex07.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex08.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex09.py', LF will be replaced by CRLF the next time Git touches it  
warning: in the working copy of 'Funcoes/ex10.py', LF will be replaced by CRLF the next time Git touches it
```

Git commit -m “” utilizado para fazer um commit dos arquivos modificados/adicionados na Branch main:

```
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git commit -m "Exercícios de Funções adicionado ao GitHub"  
[minha-feature 91fd492] Exercícios de Funções adicionado ao GitHub  
30 files changed, 205 insertions(+)  
create mode 100644 Funcoes/ex01.py  
create mode 100644 Funcoes/ex02.py  
create mode 100644 Funcoes/ex03.py  
create mode 100644 Funcoes/ex04.py  
create mode 100644 Funcoes/ex05.py  
create mode 100644 Funcoes/ex06.py  
create mode 100644 Funcoes/ex07.py  
create mode 100644 Funcoes/ex08.py  
create mode 100644 Funcoes/ex09.py
```

Git push origin utilizado para enviar os commits realizados no repositório local para o repositório remoto no GitHub:

```
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git push origin minha-feature  
Enumerating objects: 34, done.  
Counting objects: 100% (34/34), done.  
Delta compression using up to 12 threads  
Compressing objects: 100% (33/33), done.  
Writing objects: 100% (33/33), 4.09 KiB | 1.02 MiB/s, done.  
Total 33 (delta 3), reused 0 (delta 0), pack-reused 0 (from 0)  
remote: Resolving deltas: 100% (3/3), completed with 1 local object.  
remote:  
remote: Create a pull request for 'minha-feature' on GitHub by visiting:  
remote:      https://github.com/PedroHBS7/python_ex/pull/new/minha-feature  
remote:
```

No GitHub, é necessário clicar no Compare & pull request para continuar o processo:

Criar um pull request clicando em Create pull request:

Clicar em Merge pull request para fazer a requisição do pull para o merge:

The screenshot shows a GitHub Pull Request titled "Exercícios de Funções adicionado ao GitHub - Merge #1". The pull request is from the "minha-feature" branch to the "main" branch, created by PedroHBS7. The status is "Ready to merge". The pull request description is "No description provided." and the commit message is "Exercícios de Funções adicionado ao GitHub". The pull request is ready to be merged, as indicated by the "No conflicts with base branch" message. The "Merge pull request" button is visible, along with a "Close pull request" button. The right sidebar shows various settings like Reviewers, Assignees, Labels, Projects, Milestone, Development, and Notifications.

Clicar em Confirm merge para a confirmação do meu merge:

The screenshot shows the same GitHub Pull Request page, but now the "Merge pull request" button has been replaced by a "Confirm merge" button. The "Commit message" field is filled with "Merge pull request #1 from PedroHBS7/minha-feature". The "Extended description" field is filled with "Exercícios de Funções adicionado ao GitHub - Merge". The "Confirm merge" button is highlighted, and the "Cancel" button is also visible. The right sidebar shows the same settings as the previous screenshot.

Após isso, o merge foi concluído com sucesso.

Git checkout main e git pull feitos para atualizar o repositório local após o merge:

```
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git checkout main
Switched to branch 'main'
Your branch is up to date with 'origin/main'.
PS C:\Users\Pedro\Documents\Python TDE1\python_ex> git pull
remote: Enumerating objects: 1, done.
remote: Counting objects: 100% (1/1), done.
remote: Total 1 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
Unpacking objects: 100% (1/1), 933 bytes | 933.00 KiB/s, done.
From https://github.com/PedroHBS7/python_ex
   3b263a3..f93389d  main       -> origin/main
Updating 3b263a3..f93389d
Fast-forward
```
